

Dear FCC:

Satellite Radio is an exceptional and valuable advance in quality and choice for radio. Any effort to limit our choices through this new and wonderful medium would be seen for what it is - an attempt to turn back the clock and stifle competition and choice to benefit broadcasters who have not adequately addressed the limitations of their service and the needs & desires of listeners.

Please do not turn back the clock. Keep satellite radio alive and growing. Provide me and the millions of other satellite radio listeners with MORE choices, not fewer.

Sincerely,

Michael D. Taylor
